WORKSHOP 1

Visual Fields in Glaucoma: Protocols and Assessment
Omar Rafeeq & Waleed Ghobashy

Time: 13:15-14:15 on October 31
Room: Meeting Room 12
Educational Objectives:
Visual fields play an important role in the management of glaucoma. There are, however, many pearls and pitfalls in their interpretation.

In a highly interactive fashion, the participants will learn how to correctly interpret Humphrey and octupis visual fields. This highly acclaimed course has been an eyeopener to many clinicians all over the world.

WORKSHOP 2

OCT Guided Optic Disc Assessment
Scott Smith, Ahmed Mostafa Abdelrahman & Rajesh Sasikumar

Time: 10:00-11:00 on November 2
Room: Meeting Room 4
Educational Objectives:
Participants will learn to recognize artefacts in OCT imaging for glaucoma diagnosis. They will also learn to judge the quality of the images. In a next step, they will learn to interpret the images and how they may assist them in the management of glaucoma.

This will all be done by examining many images (both structural and functional) of a multitude of clinically interesting cases.
